Antiterrorism: Exposing the Deep State

No. 103

New World News Bureau

May 20/20

The “Deep State” is the proto-government aimed at the creation of a “New World Order” (*Novus Ordo Seclorum*), a world ruled by one government. This is undoubtedly the organization referred to by President John F. Kennedy in a speech given at the Waldorf Astoria in April 1961:

Special Report

The Johns-Hopkins Medical School website seems to be the go-to spot for media-reported covid-19 statistics. <<https://coronavirus.jhu.edu/map.html>> The statistics at this writing are as follows:

- a) Total confirmed: 4,805,005
- b) Total deaths: 318,534
- c) Total recovered: 1,787,527

To find the total number of resolved cases, simply add b) and c) together. Thus the number of *unresolved* cases must be $a) - b) - c) = 2,698,944$ for these data, a pretty big number. But what, exactly does it represent? Apparently, what I have called the “unresolved cases” is more than half the total number of cases. The only logical explanation is that this last number represents the total number of cases that tested positive, but never showed symptoms — beyond the test itself. That changes everything and it would point to the misleading nature of the very first statistic. Naive readers would be apt to interpret the alarming 4 million-plus figure as people with covid-19 symptoms. It apparently doesn't. A more rational (and less alarming) approach would be to replace the first column by one headed “total symptomatic”, That worked result in a change to a number like 4,805,005 by subtracting 2,698,944 from it to obtain 2,106,061. How about that! Not so scary now, is it.

A. K. Dewdney
