Antiterrorism: Exposing the Deep State

---

---

No. 130

**New World News Bureau**

Jun23 /22

---

---

The “Deep State” is the proto-government aimed at the creation of a “New World Order” (*Novus Ordo Seclorum*), a world ruled by one government. This is undoubtedly the organization referred to by President John F. Kennedy in a speech given at the Waldorf Astoria in April 1961: (Cont’d. at the bottom of this frame.)

**In this issue we introduce a new feature, as below. While past issues have covered past events, this new section covers possible future events, a form of pre-emptive programming. The remainder of this issue is confined to the most urgent news as sent in by correspondents. Our second instalment of the new feature appears below: Why did “climate change” replace “global warming”?**

## OFFICE OF SPECIAL PLANS

### **Operation Icebox:**

In the autumn of 2013 solar physicists got the shock of their lives when the 11-year solar cycle failed. At the end of each cycle, the sun’s magnetic field normally reverses, with the north and south magnetic fields of the sun undergoing a grand reversal. In the midst of this swap, the magnetic field strength declines to zero then ramps up again; however in the middle of this last swap, the reversal came to a grinding halt, leaving a very weak field. The phenomenon was unprecedented and scientists scratched their heads.

Henrik Svensmark at the Danish Institute of Solar Physics was also puzzled but also worried. He and his team at the Institute had developed a theory connecting the solar magnetic field to the Earth’s climate. The strength of that field screens out cosmic rays which, in turn, enter our atmosphere, triggering x-ray showers. These, in turn cause extensive low-level cloud formation by ionizing dust particles in the Earth’s atmosphere. Then global temperatures begin a slow decline. The success of an experiment performed at the DISR was repeated at the CERN Collider facility in Geneva, Switzerland. The story of this remarkable discovery appears in a book.\*

Enter the Deep State: As Kennedy stated in his 1961 speech, the Deep state has

access to full scientific resources and might well have absorbed the Svensmark theory, understanding that the “Little Ice Age” was a likely outcome of weakening in the sun’s magnetic field, there being a risk of it happening again. Meanwhile, this prime discovery never made it into the legacy media, indicating a possible deliberate block on the finding. Then came the old switcheroo; “global warming” suddenly morphed into “climate change” — within a year of the book’s appearance. The Deep State may well have congratulated itself for being prepared for the sun’s weakening some seven years *after* the name change.

If “climate change” ever becomes global cooling, the Deep state will be ready with a new narrative; “scientists” will come up with a new mechanism for the change, perhaps as spelled out in the movie *The Day After Tomorrow*: global warming causes a shift in the Gulf Stream, which cuts off Europe from its usual supply of warm water. In fact the Atlantic freezes over! Deep State science on the march, and all the result of a tiny increase in global CO2. Amazing!

Henrik Svensmark & Nigel Calder, *The Chilling Stars*, Totem Books, USA, 2006.

(next month: an alien invasion; **Operation Mufon**)
