# The NEW WORLD INTELLIGENCER

Antiterrorism: Exposing the Deep State

No. 133

## **New World News Bureau**

Oct 11 /22

The "Deep State" is the proto-government aimed at the creation of a "New World Order" (*Novus Ordo Seclorum*), a world ruled by one government. This is undoubtedly the organization referred to by President John F. Kennedy in a speech given at the Waldorf Astoria in April 1961: (Cont'd. at the bottom of this frame.)

## **BUREAU OF PRE-EMPTIVE PLANNING**

## **Operation: Dark Winter**

One operation that has yet to be tried by the Deep State has already been suggested occasionally on the AltNews web. It would cut power to large parts of various countries. Power failures of as little as one week's duration can produce suprisingly high death rates. Early on there will be many deaths among elderly apartment dwellers. Stairs that must be descended and climbed repeatedly will be the cause of many heart attacks and strokes. Food will not be available, especially in the presence of food shortages.

As for death rates, it is difficult to attach various death rates to duration; what is the expected death rate for durations of n days? The rate would certainly climb with duration and will vary from community to community, depending on the distribution of dwelling types — single homes vs apartment buildings. Survivability would also depend on the proportion of emergency power generators and availability of replacement transformers..

Some of the guesswork can be taken out of this analysis if one assumes that the major outage in question takes place during the winter in the presence of food shortages already in place. After a mere week-long outage, many will be dying of hypothermia, especially old people who cannot generate enough body heat to keep their core temperature above critical levels. Once that level is passed, shivering stops, the victims feels warm and comfortable and eases into a kind of paradoxical death. Starving people are roughly in the position of the elderly in being unable to sustain their core temperatures. Realize that all houses and buildings either do not

have emergency generators or, if they do, only enough fuel for a few days of operation.

Under the circumstances just outlined, I would be inclined to guess that even a one-week power failure would result in millions of death in a populous area. After two weeks of the same, I would guess over half the population would be gone.=, the ultimate goal of deliberate depopulation. As for the perpetrators of this evil operation, who else but but those dastardly Russian hackers!
