

The NEW WORLD INTELLIGENCER

Antiterrorism: Exposing the Deep State

No. 144

New World News Bureau

Jun10/23

The “Deep State” is the proto-government aimed at the creation of a “New World Order” (*Novus Ordo Seclorum*), a world ruled by one government. This is undoubtedly the organization referred to by President John F. Kennedy in a speech given at the Waldorf Astoria in April 1961: (Cont’d. at the bottom of this frame.)

MODUS OPERENDI

Operation Carbonblack: (How to start wildfires at the push of a button.)

In the last two-three years there have been an unprecedented number (two dozen, at least) of barn fires here in Ontario and it would come as no surprise that they are occurring in large numbers elsewhere as well. The cause of all these fires is not at all clear. Although fire investigators have attributed some fires to faulty electrical systems, maybe those systems were faulty to begin with. As it happens, Investigators are under pressure to come up with an explanation.

In the case of the wildfires in California observers on the ground have reported on single trees in an otherwise healthy stand just suddenly bursting into flame, not to mention “toasted” cars parked beside other wise healthy stands. These are eerily reminiscent of the toasted cars found parked in streets adjacent to the WTC towers on the morning of 9/11.

Wikipedia: “**Space weapons** are [weapons](#) used in [space warfare](#). They include weapons that can attack space systems in orbit (i.e. [anti-satellite weapons](#)), [attack targets on the earth from space](#) or [disable missiles](#) travelling through space. In the course of the [militarisation of space](#), such weapons were developed mainly by the contesting [superpowers](#) during the [Cold War](#), and some remain under development today . . .”

It is entirely feasible to construct a satellite with a powerful source of electricity and a microwave antenna that can aim a high-powered and narrowly focussed microwave beam at any earth target whatever. Because such satellites can be built,

the temptation to build and deploy them would be irresistible for any military power. The localized nature observed in the California wildfires, not to mention the large uninhabited areas in coniferous forests would make it child's play to set localized fires which, in tinder-dry conditions, would spread very rapidly. There you have it; must be Global Warming er, Climate Change.
