Antiterrorism: Exposing the Deep State

No. 099

New World News Bureau

Mar8/20

The “Deep State” is the proto-government aimed at the creation of a “New World Order” (*Novus Ordo Seclorum*), a world ruled by one government. President John F. Kennedy apparently referred to the NWO in a speech given at the Waldorf Astoria in April 1961. (Scroll to bottom.)

Special Feature:

Our take on the Covid-19 virus focuses on the synthetic nature claimed by several articles that appear at the end of this *Intelligencer*; there is a strong possibility that it was synthesized in a laboratory by starting with an HIV gene and making two DNA inserts that presumably enhanced its virulence. It’s too early to say what the ultimate purpose of all these pandemics may be — apart from scaring the psychologically vulnerable into accepting mass vaccinations. As Jim Stone points out in a lengthy analysis, the ultimate purpose is unlikely to be the enhancement of human life on the planet. He also discusses a strange coincidence that involves the appearance of new viruses in the same years as presidential or mid-term elections, as below. Does this mean that “pandemics” play a role in elections, somehow? We try to answer this question at the end of this newsletter.

SARS — 2004 AVIAN — 2008 SWINE — 2010 MERS — 2012
EBOLA — 2014 ZIKA — 2016 EBOLA — 2018 CORONA — 2020

In any event, the finite life of previous pandemics may serve to predict a limited presence of Covid-19. (Scroll to the bottom for the rest.)

Jin Stone has compiled some useful observations at this website: <<http://82.221.129.208/.vq3.html>>. In perusing this material, one notices the occasional reference to God. Those who habitually cringe at such references, possibly owing to a secular upbringing, had better realize that any source of moral authority is a

welcome ally in the struggle against the evil that enshrouds our planet. Such sources would include virtually all of the monotheistic religions, for starters.

As for the question concerning the possibly non-coincidental nature of pandemics occurring in election years, two observations provide a possible answer. First, it will be observed that most previous virus pandemics seem to have died out, probably because the virus was not as effective as its designers had hoped. In this case, they would not be deemed terrifying enough to persuade populations (through the print and broadcast media, of course) that mass vaccinations are the obvious way to stop the spread. The second part of the analysis is guesswork: if mass vaccination is the ultimate aim, just one of the political parties would adopt such measures on its election platform, the other abstaining. In such a case, the Democratic Party would be the likely candidate for the message, with Republicans holding back, giving either Sanders or Biden a clear run at the Presidency. (Gasp!) The media will simply continue their full-court press.

Readers will have noticed a new section has been added to *The Intelligencer*. We will keep this section going as long as the coronavirus “pandemic” lasts. The articles included in this issue all examine the possibility of an engineered virus.

Excerpt from President Kennedy’s speech: “For we are opposed around the world by a monolithic and ruthless conspiracy a system which has conscripted vast human and material resources into the building of a tightly knit, high-ly efficient machine that combines military, diplomatic, intelligence, economic, scientific and political operations.” President John F. Kennedy speaking at the Waldorf Astoria, April 1961. <<https://www.youtube.com/watch?v=RhkjYJAHcjM>>
